Bathroom Collections

VitrA

We progressively invest in essentially human spaces - the bathrooms.

The complete bathroom

Exploring physical and emotional needs, VitrA invests in design to produce every essential element in the bathroom.

It's all about inspiration

It all begins with questions posed by the design discipline to understand needs, desires and choices. Designed by VitrA, an extraordinary wealth of attractive combinations help satisfy these needs and desires.

High powered perfection

Seven cutting-edge factories and plants in Turkey and Russia, create sophisticated designs and maintain extremely high standards, whilst progressively reducing VitrA's ecological footprint.

Collaboration with designers

VitrA works with acclaimed industrial designers from around the world. Not only does the collaboration with these top talents improve product functionality, but it also introduces an entirely original range.

VitrA across the world

Bathroom designs greet customers around the world through 2000 sales points in over 75 countries, including 150 exclusive VitrA showrooms in Istanbul, London, Cologne, Moscow, Dubai, Mumbai, Delhi, and other major cities.

Technology lights up the future

The VitrA Innovation Centre serves as the headquarters of the brand's R&D activities with a strong engineering team, leading the bathroom industry with new solutions and technologies.

Improved personal hygiene

VitrA's continuous research into human health introduces new technologies for improved hygiene in the bathroom. These solutions raise the personal hygiene experience to a new level.

A pledge to the future

VitrA embraces Blue Life, a set of guidelines devised to mitigate our impact on the environment, and is held as a production, design and management philosophy.

About Vitra

• —

The bathroom is the most versatile space capable of meeting a number of human needs – physical or emotional. This is why we have dedicated ourselves to, and invest in, bathrooms. Vitra, the flagship of the Eczacıbaşı Group, is one among the brands in the global markets offering every component of the bathroom.

Dr. Nejat F. Eczacıbaşı
The founder of The Eczacıbaşı Group

Enduring values

A high-achieving competitor in foreign markets today Vitra is the leading global provider of a full range of bathroom components. Seventy per cent of production is sold abroad through a powerful distribution network.

This extraordinary accomplishment is anchored in the founder's unshakable vision. Dr. Nejat Eczacıbaşı always maintained that lasting success demanded hard work, risk taking and innovation: 'Success comes those who eschew the easy path, and boldly embrace innovation and advances.'

Vitra's logo chronology

High powered perfection

• —

Designer and manufacturer of every essential element in the bathroom, the Eczacıbaşı Building Products Division has an annual capacity of 6.9 million units of ceramic sanitaryware, 30 million square metres of ceramic and porcelain tiles, 2 million taps, 350,000 bathtubs and shower trays, 795,000 modules of bathroom furniture, 1 million concealed cistern and 1 million accessories.

Carefully calibrated for minimal resource consumption, these cutting-edge factories and plants create sophisticated designs and maintain extremely high standards whilst progressively reducing Vitra's ecological footprint.

- Bozüyük, Bilecik, Turkey
- Tuzla, İstanbul, Turkey
- Serpukhov, Moscow Oblast, Russia

Innovation lights up the future

• —

Located in Bozüyük, Bilecik – Turkey, near the main production plant, the Vitra Innovation Centre is envisioned to serve as the headquarters of the brand's R&D activities with a strong team mainly involved in material and process development, product development and technology development. It also coordinates collaborative projects with universities and external consultants.

From elemental dynamics to nanotechnology and electronics, every branch of science and industry is a candidate for exploration at the Vitra Innovation Centre, generating new tools and skills for Vitra to redefine form and function for the contemporary bathroom.

Sustainability at Vitra

Sustainability is a term that has been commonly used since the global climate change became an issue. To minimise the environmental damage of the construction industry and to preserve natural resources, applications and solutions to prevent these issues have been suggested through various environmental approaches. Whether or not these applications are embraced and followed by the manufacturers is the most crucial issue.

Embracing sustainability as a business approach, Vitra develop practices and solutions that will prevent existing and potential problems through environmental approaches in order to minimize environmental damage and protect natural resources. Having turned its practices into a corporate mission by signing the Global Compact in 2006, Eczacıbaşı Building Products strives to improve its ongoing facilities in accordance with the UN Sustainable Development Goals.

People

Vitra is considered to be pioneers of the future on UN Global Compact and non-governmental volunteering platforms such as the Business Council for Sustainable Development in Turkey. They are board members of international platforms such as the European Federation of Ceramic Sanitaryware Manufacturers (FECS), the European Ceramic Industry Association (Cerameunie) and Bathroom Manufacturers (BMA). Eczacıbaşı Building Products retains its leading position also in sustainability as a member of the Turkish Ceramics Federation (SERFED) and the Association of Construction Material Producers (IMSAD).

Achieve diverse culture

Enhance collaboration

Create lasting impact

Products

Eczacıbaşı Building Products' responsibility to preserve natural resources begins with the design of products offered for houses and common areas. Vitra's design approach is about decreasing the amount of water used in products developed, such as urinals, toilets, taps and mixers, therefore saving fresh water used per person, power consumption and cutting down on carbon emissions. The products designed with this approach have received world-renowned awards such as iF Design, Plus X Design and Good Design.

Promote product stewardship

Aim for resource efficiency

Increase sustainability awareness

Production

With technological investments promoting more mindful use and recycling of raw materials, Eczacıbaşı Building Products also pursues its responsibility to preserve natural resources at the production stage. The projects carried out with this approach achieve national and international success, receiving awards from the Istanbul Chamber of Industry (ISO), the Kocaeli Chamber of Industry (KSO) and the Turkish Green Building Council (CEDBIK) along with European Union Environment Awards and the European Business Award for the Environment.

Use less resources

Minimise waste & maximise circularity

Invest in renewable energy & reduce emissions

#bathrooms for our planet

Design that inspires

It all begins with questions. Questions posed by the design discipline. Questions to understand needs, desires and choices. Questions to establish new requirements, to develop new tastes, and to create brand-new experiences.

Over time, trends and developments may alter life's challenges, as well as expectations and habits. Vitra is fully committed to investigating and improving these essentially human spaces: bathrooms. As a result, an extraordinary wealth of attractive combinations helps shape physical space in the midst of urban life, in domestic, commercial, or public bathrooms.

Tom Dixon

Tom Dixon is a British designer whose work is represented in the collections of New York's Museum of Modern Art, the Victoria and Albert Museum and the Centre Georges Pompidou. Forging his reputation with welded salvage furniture in the 1980s, he went on to establish the Tom Dixon brand in 2002 while working as creative director of Habitat. Specialising in furniture, lighting and accessories, the brand is now represented in 90 countries with hubs in world cities including London, New York, Los Angeles, Hong Kong, Tokyo and Beijing. Dixon designed the Liquid Collection for Vitra.

Christophe Pillet

A multi-disciplinarian involved in product- and furniture design through to interiors, architecture, scenography and artistic direction, Pillet's creations for leading brands include Cappellini, Daum, JC Decaux, Driade, Ecart International, Emu, L'Oréal, Lacoste, Moroso, Porro, Renault, Serralunga, Shiseido, Shu Uemura, Veuve Clicquot Ponsardin, Hôtel Sezz, and Whirlpool. Pillet, who seeks to express, 'simplicity, timeless design and a touch of distant elegance,' has designed the Memoria Collection for Vitra.

Ross Lovegrove

One of the most fascinating designers of the 21st century and recipient of numerous awards, Ross Lovegrove creates sculptural and organic shapes using sophisticated technology and materials. His design concept 'organic essentialism' is inspired by elements from the natural world which are then reshaped into futuristic forms. The exquisite Istanbul Collection is the product of Lovegrove's collaboration with Vitra.

Terri Pecora

Since qualifying in California and Milan's Domus Academy (1990), the versatile Los Angeleno Terri Pecora has designed furniture, bathroom products, stands, retail interiors, eyewear, fashion accessories and children's products. Aesthetic functionality best describes her work, and she has often experimented with unexpected solutions which set her projects apart whilst responding to the needs of users and the market. Pecora is the designer behind Vitra's Plural Collection.

Claudio Bellini

Claudio Francesco Bellini lives and works in Milan, where he graduated in Architecture and Industrial design from the renowned Politecnico in 1990. Early in his career, Bellini focused on office furniture. Later, after winning a number of prestigious architectural competitions, he moved into designing large showroom interiors and developed products for prominent Italian and international companies. Bellini is the creator of Vitra's Equal collection.

Arik Levy

'Creation is an uncontrolled muscle,' says all-rounder Arik Levy. Artist, technician, photographer, designer, and video artist, Levy's work can be seen in prestigious galleries and museums across the world; he creates hi-tech clothing lines and accessories as he continues to contribute substantially to our interior and exterior milieux from his studio in Paris. Levy designed the Voyage Collection for Vitra.

Matteo Thun + Partners

The Milan-based Matteo Thun + Partners studio of architecture, design and communication refuses stylistic pigeon-holing, which explains its capacity to approach with boundless originality and vitality such a vast variety and scale of work, ranging from hotels to coffee cups. Thun has designed Water Jewels for Vitra, an exotic collection that puts a variety of materials to a highly imaginative use.

Sebastian Conran

The acclaimed design explorer Sebastian Conran, whose product design and development studio focuses on creating charismatic retail merchandise and user experiences that are contemporary, innovative and satisfying, has created cleverly refined bathroom accessories for Vitra: the extraordinarily extensive Eternity range, with a vast array of colour and material options, is versatile enough to have something for every elegant bathroom.

Vitra Hygiene

Vitra Hygiene

Vitra Hygiene, which coats all Vitra ceramicware, inhibits the growth of harmful bacteria by 99.9%. The Vitra Hygiene glaze coats all external and internal surfaces prior to firing in a process that ensures lifetime Vitra Hygiene protection for Vitra ceramic sanitaryware even under the most intense usage conditions.

Vitra Clean

Vitra Clean

Limescale is persistent in most bathrooms. Washbasins, WC pans and bidets are coated with Vitra Clean technology. No harsh chemical cleaning agents are needed to keep them beautifully stain-free for years.

Vitra Fresh

Vitra Fresh

Vitra Fresh dispenses a pre-determined amount of cleaning fluid into the water every time the flush button is pressed. The dispenser can be filled with non-bleach cleaners, limescale reducers or fresheners. It gives a hygienic wash and freshens with each flush.

Vitra Rim-ex

Vitra Rim-ex

The smoothly attractive rimless WC pan Rim-ex prevents germ proliferation and offers superior hygiene thanks to its innovative design. Tests show Rim-ex is 95% more hygienic as compared to standard WC pans.

Touch-free

Vitra Touch-free

Controlled by a built-in sensor, the Vitra Touch-free Basin Mixer improves hygiene in public toilets and reduces the risk of pathogen cross-contamination. The sensor detects the user and contributes to water saving by stopping the flow as soon as the user moves away from the detection area.

Comfort control

Comfort control

Direct water to the desired outlet with the button marked.

Blind sight

Blind sight

The active button bulges out slightly while taking shower. So, you can easily find the AquaControl's button diverter even when your eyes closed.

Mechanical solution for bidet function

Mechanical solution for bidet function

A mechanical solution offering the washing feature providing personal hygiene.

VitrA Rim-ex

Free of the channels and openings that can harbour harmful dirt and micro-organisms, the VitrA Rim-ex rimless pan design makes these WC pans 95% more hygienic* than standard pans, and easier to clean. Its patented technology ensures a thorough and 25% more hygienic flush each time.

*Tests undertaken by the Akdeniz University, Turkey show VitrA Rim-ex WC pans are easier to clean and 95% more hygienic compared to standard WC pans.

The redesigned bowl features a smooth, channel-free design to discourage germ reproduction, and provides superior hygiene.

- ① Rimless bowl
 - Easy-to-clean with no rim or channel for germs to collect
 - Efficient flushing in specially designed bowl
- ② Water Distribution Tool
 - Specially engineered water diverter
 - Removable for easy cleaning
 - Flushes to 65 mm from the top of the pan for added cleaning

VitrA Clean

Surface that repels dirt and dirty water

VitrA Clean has hydrophobic finish over the entire ceramic surface, which repels dirt and dirty water and simplifies cleaning without the need for aggressive agents. VitrA Clean causes water to form droplets that slide down the sloping ceramic surface. As they are pulled down by gravity, these globules carry away any clinging dirt, thereby cleaning the surface.

Developed by the VitrA innovation team and constituting of long chains of molecules, VitrA Clean is suitable for all ceramicware surfaces such as washbasins, WC bowls and bidets in any colour or specification. VitrA Clean's protection lasts for the lifetime of the ceramicware under even the most intense use conditions.

VitrA Fresh

Cleaning with detergent in every flush

WC bowls and urinals equipped with a VitrA Fresh detergent dispenser clean and prevent limescale and odours with each flush.

VitrA Fresh dispenses a pre-determined amount of cleaning fluid into the water every time the flush button pressed. The dispenser can be filled with non-bleach cleaners, limescale reducers or fresheners. It gives a hygienic wash and freshens with each flush. Installed independent of the cistern, the VitrA Fresh dispenser presents no risk to internal parts.

The patented dosage system adds 1 ml of cleaning fluid into the wash with no need for additional wiring or batteries. The dispenser has a maximum capacity of 800 flushes in a WC and 400 in a urinal.

Auto flush after every use

In public urinals with VitrA Touch-free technology, the bowl is washed automatically, reducing the risk of pathogen cross-contamination.

Once the VitrA sensor has detected the user and monitored the amount of time spent before the urinal, it washes the bowl with the appropriate volume of water in order to contribute to water saving.

Touch-free

Touch-free hand wash technology

Controlled by a built-in sensor, the VitrA Touch-free Basin Mixer improves hygiene in public toilets and reduces the risk of pathogen cross-contamination.

The sensor detects the user and contributes to water saving by stopping the flow as soon as the user moves away from the detection area.

Double inlet Origin mixers allow management to set the ideal water temperature through a concealed adjustment system, thereby saving users from having to touch the controls to adjust water temperature. Thermostatic versions maintain temperature without the need for adjustment; in case of a cold water cut, the hot stream is also stopped to prevent scalding.

Powered by mains or batteries, these mixers are completely safe thanks to waterproof wiring conforming to IP68 standards.

Soap dispenser that reduces the risk of pathogen crosscontamination

VitrA's Touch-free Soap Dispenser improves hygiene in public toilets and reduces the risk of pathogen cross-contamination.

With built-in and countertop models, the dispensers are powered by mains or batteries and are perfectly safe thanks to waterproof wiring conforming to IP68 standards.

The one litre container offers 650 uses on average from one refill.

Bidet function

Effortless washing system

Water is the most efficient way to clean any body part. This innovative solution, developed using a bidet nozzle, helps you clean hard-to-reach areas effortlessly. The need for hygiene gets even more important during times of health problems, women's menstrual cycles and at older ages. Not only are these Bidets functional but also almost invisible keeping your bathroom chic.

Personal washing system

Designed for every bathroom

- Concealed bidet connection**
- Concealed connection parts
 - Wall embedded stop valve connection

Integrated stop valve connection with thermostatic cartridge

- Thermostatic cartridge initially keeps the water temperature at 38° to prevent contact with hot water
- Stop valve connection is present on the WC

- Integrated stop valve connection with standard cartridge**
- Can adjust water temperature between 20° - 60°
 - Stop valve connection is present on the WC

Touch-free toilet experience

Approach

The V-Care Smart Panel drop shape lights on when the V-Care Smart Panel sensor has detected the user.

The WC is ready for use without the need to touch any surface.

How it works

The VitrA Touch-free Bidet starts the wash when the sensor detects the user's hand, and stops on when it detects the hand a second time.

This means there is no need to worry about who may have used the WC before you.

Flushing

The VitrA Touch-free WC Seat closes automatically when the user stands up and moves away, and the toilet flushes only after the lid is shut.

This prevents the risk of bioaerosol contamination via inhalation or contact with surfaces. It also guarantees a clean WC pan.

After flushing

After the toilet is flushed, the toilet lid opens again and is ready for the next user.

Touch-free auto and periodic flush

An indispensable element in the VitrA smart bathroom products ecosystem, the V-Care Smart Panel undertakes a major role in creating a hygienic environment and protecting public health. With twenty-two patented technologies, the V-Care Smart Panel's auto flush feature prevents the need to touch the panel and reduces the risk of cross-contamination. Even when a manual flush is required, there is no need to touch the panel; it is enough to bring the hand to 10 mm away from the panel. In case a second flush is necessary to clear the bowl, the V-Care Smart Panel waits until the cistern is completely full to ensure a more effective flush.

A period of inactivity could lead to bacterial proliferation, backflow through the waste pipes and even a build-up of minerals and other deposits. The periodic flush mode regularly washes the bowl to minimise the risk of dirt, stains, odours and bacterial growth, thereby greeting users with a hygienically clean toilet every time. The default setting is ON, but it can be turned OFF via the mobile app.

The mobile app offers additional benefits such as comfort, usage data display, remote control and updating. Thanks to the network connection, the V-Care Smart Panel firmware always remains up to date. The dashboard enables remote monitoring of all installed plates, statistics viewing, and function control for commercial enterprises and institutions.

VitrA Hygiene

Ion-rich technology that inhibits the growth of harmful bacteria

VitrA Hygiene, which coats all VitrA ceramicware, inhibits the growth of harmful bacteria by 99.9%. By disrupting the cellular structure of bacteria that cling to the surface during use, this proprietary glaze prevents them from proliferating into a colony.

Tests in accordance with the national and universal ISO 22196, JIS Z 2801, ASTM E 3031-15, and TSE 13420 protocols have verified the efficacy of VitrA Hygiene against gram negative (*Escherichia coli*) and gram positive (*Staphylococcus aureus*) strains.

The VitrA Hygiene glaze coats all external and internal surfaces prior to firing in a process that ensures lifetime VitrA Hygiene protection for VitrA ceramic sanitaryware even under the most intense usage conditions.

Fewer chemicals and better hygiene with VitrA Hygiene.

Expressive minimalism

Liquid is a unique collaboration between Tom Dixon and Vitra, bringing the British designer's philosophy of expressive minimalism to the bathroom.

The collection evokes a sense of permanence with soft and rounded forms in durable white porcelain. Contrast and definition is delivered via a supporting cast of solid taps, showering solutions and iconic accessories.

Expressive of function and instinctive in use, the comprehensive collection encompasses enduring ceramic silhouettes and shapely brassware and showers – an integrated system offset by harmonious furniture and a range of wall tiles.

VitrA Hygiene

VitrA Clean

Mechanical
solution for
bidet function

A monochrome aesthetic

The bones of this collection are the all-white ceramics, offset with signature chunky brassware in either gloss black or classic chrome finish – a quintessential and timeless core aesthetic for the bathroom.

However you choose to use it, Liquid is the foundation of a truly personal bathroom.

Creativity in ceramics

Extending sculptural ceramics beyond the traditional realms of basins and sanitaryware, the collection includes the unusual feature of a rotund moulded ceramic stool – for use in the shower or anywhere else in the home.

Practical and slab-like ceramic countertops and shelves are an integral part of the Liquid language, while the soft-edged aesthetic also forms an expressive frame for an obround-shaped mirror with inbuilt lighting.

Trusted materiality

Liquid's washbasins span an expressive range from discrete inset solutions to wall-hung, countertop and freestanding options.

A butler sink, obround-shaped basin and cylindrical high bowl are part of the armoury along with a wall-mounted double basin. Countertop options are designed to rest on Liquid's ultra-practical ceramic slab, and wall-hung variants can be paired with a ceramic pedestal.

A statement monoblock basin moulded as a single piece of ceramic is designed for use with wall or floor-mounted taps. In contrast, a wall-mounted basin extends the horizontal plane in a seamless integration of bowl and counter.

Refined attraction

• —

Tom Dixon's signature conical theme is extended to expressive showerheads and controls – either wall or ceiling mounted. An integrated hand-held showering option makes use of an innovative, easy to use magnetic connection, while a floor-mounted outdoor shower provides solutions for poolside and garden use.

Water Jewels by
Matteo Thun & Partners

Ceramics available in

Matteo Thun

Traces of the past, modernism of the present

A world-renowned, Milan-based studio, headed by the multi-award-winning Matteo Thun, famous as much for outstanding architecture as innovative design.

It's his talent for visualisation of form and space, alongside a deep understanding of the latest materials and technologies available that makes Matteo Thun's bathroom design so original.

The Water Jewels collection offers something truly extra special to those with a taste for the exotic. Matteo Thun's pure forms balance the curved and the linear with an added dimension, thanks to Vitra's own innovative, advanced manufacturing technology. The result is a range that balances space, form and function to quite stunning effect.

Perfect washbasins with a holistic design

The washbasins combine eye-catching vertical lines with softly turned corners and feature a fluid design language with details ranging from overflow holes to siphon plugs. The various form, colour and size options in the collection offer many alternative solutions that make it easy to create your own unique style.

Essentials

VitrA V-Care Smart Toilet

• —

The ultimate personal hygiene experience

Comfort at your fingertips

VitrA V-Care Smart Toilet Prime enhances your toilet experience with technology, including remote control and a mobile app. It provides full control of your hygiene with its touch-free use and keeps your personalised settings for V-Care in the app.

V-Care Smart Toilet Prime Personal hygiene features

Every detail is designed for personal hygiene and well-being.

Front and rear wash

The nozzle produces a rear wash suitable for all, as well as a gentler front wash as a bidet for women.

Adjustable nozzle position

Perfect cleansing by adjusting the nozzle back and forth.

Adjustable water temperature

Five different water temperature settings offer a more comfortable cleansing ritual.

Adjustable water pressure

Five different levels of water pressure offer a thorough and pampering wash.

Oscillating wash

The bidet nozzle moves back and forth for a thorough clean over a larger area.

Massage wash

The water pressure alternates between gentle and firm for a massaging wash.

V-Care Smart Toilet Prime Comfort features

Every detail is designed for comfort.

Adjustable seat temperature

The seat has a choice of five temperature settings to complete your comfort.

Auto open/close lid

The motion sensor automatically raises the lid on detecting your approach, eliminating the need to touch it.

Open/close lid and seat

The lid and seat can also be opened and closed by remote control or mobile app, with no need to touch the seat.

Dryer and adjustable air temperature

After washing, the warm-air dryer provides fast and gentle drying. Also, free yourself from toilet roll. Five different levels of air temperature settings offer more comfortable drying.

Air purification

Thanks to powerful deodoriser filters, the air is freshened around the toilet.

Night light

The LED night light is automatically activated when the ambient light levels fall.

VitrA V-Care Smart Toilets offer the best options to answer your water-based cleansing needs.

Touch-free auto and periodic flush

• —

An indispensable element in the VitrA smart bathroom products ecosystem, the V-Care Smart Panel undertakes a major role in creating a hygienic environment and protecting public health. With twenty-two patented technologies, the V-Care Smart Panel's auto flush feature prevents the need to touch the panel and reduces the risk of cross-contamination.

Even when a manual flush is required, there is no need to touch the panel; it is enough to bring the hand to 10 mm away from the panel. In case a second flush is necessary to clear the bowl, the V-Care Smart Panel waits until the cistern is completely full to ensure a more effective flush.

A period of inactivity could lead to bacterial proliferation, backflow through the waste pipes and even a build-up of minerals and other deposits. The periodic flush mode regularly washes the bowl to minimise the risk of dirt, stains, odours and bacterial growth, thereby greeting users with a hygienically clean toilet every time. The default setting is ON, but it can be turned OFF via the mobile app.

The mobile app offers additional benefits such as comfort, usage data display, remote control and updating. Thanks to the network connection, the V-Care Smart Panel firmware always remains up to date. The dashboard enables remote monitoring of all installed plates, statistics viewing, and function control for commercial enterprises and institutions.

Vitra Design Team

Ceramic virtuosity

Vitra's team of in-house designers represent the backbone of our design philosophy and culture. These emerging stars are supported by multidisciplinary teams at the Vitra Innovation Centre. The hallmarks of Vitra's collections are innovative design based on sustainability, 'design for all' principles and superior concepts underpinned by sophisticated technology.

Bringing a fresh new look to basin design, the Outline range made from cerafine ceramic with the Vitra Clean glaze offers a choice of shapes and finishes. Unique to Outline, Vitra introduces the new pebble shape to this range of countertop basins. The four additional shapes available are TV, oval, square, and round.

Root Bathroom Furniture

Faucets available in

Bathroom furniture colours - Root Groove and Root Classic

Bathroom furniture colours - Root Flat

The perfect solution for a dream bathroom

The new Root Collection is based on a simple design idea that allows you to create your ideal bathroom.

The collection, created with every detail in mind, offers a variety of size and style options to fit any bathroom. With an array of colours to choose from you can personalise your furniture with additional handle and leg options.

Tidier bathrooms

Root Bathroom System has been designed to meet all kinds of needs. Cabinets and drawer units help to keep items organised. Partitions inside the drawers enable easy organisation of items such as hair dryers, brushes and bathroom essentials to maintain a tidy bathroom space.

Rich colours

Root Flat offers three different finishes: matt, high gloss and wood. Matt and high gloss colors are made from 100% recyclable material.

The high gloss white, pearl grey, anthracite and sahara beige colours add a shine to the bathroom with their smooth gloss finish.

The rock grey, storm grey and dark blue colours have a matt finish and work perfectly for creating a modern looking bathroom. Contrasted with natural wood on the inside of the drawers, these finishes create a warming balance.

Natural oak, walnut and Cordoba colour options are available for those who want the warm and calming effect of wood in their bathrooms. It provides a stylish and natural contrast to the anthracite colour wood inside the drawers of the washbasin units.

A modern look

Root Groove offers a modern style with its matt colours and joint detail on the doors.

The collection, offers seven colour finishes in an array of warm and cool tones. This includes: white, light grey, grey, graphite, dark blue, retro green and fjord green.

The handles are available in black, white or chrome, to allow you to match your brassware and accessories seamlessly.

Experience the future of bathrooms

VitrA strives for an excellence that goes way beyond the surface of our products. In fact, from design to production and customer service we aim for nothing less than perfection at every stage.

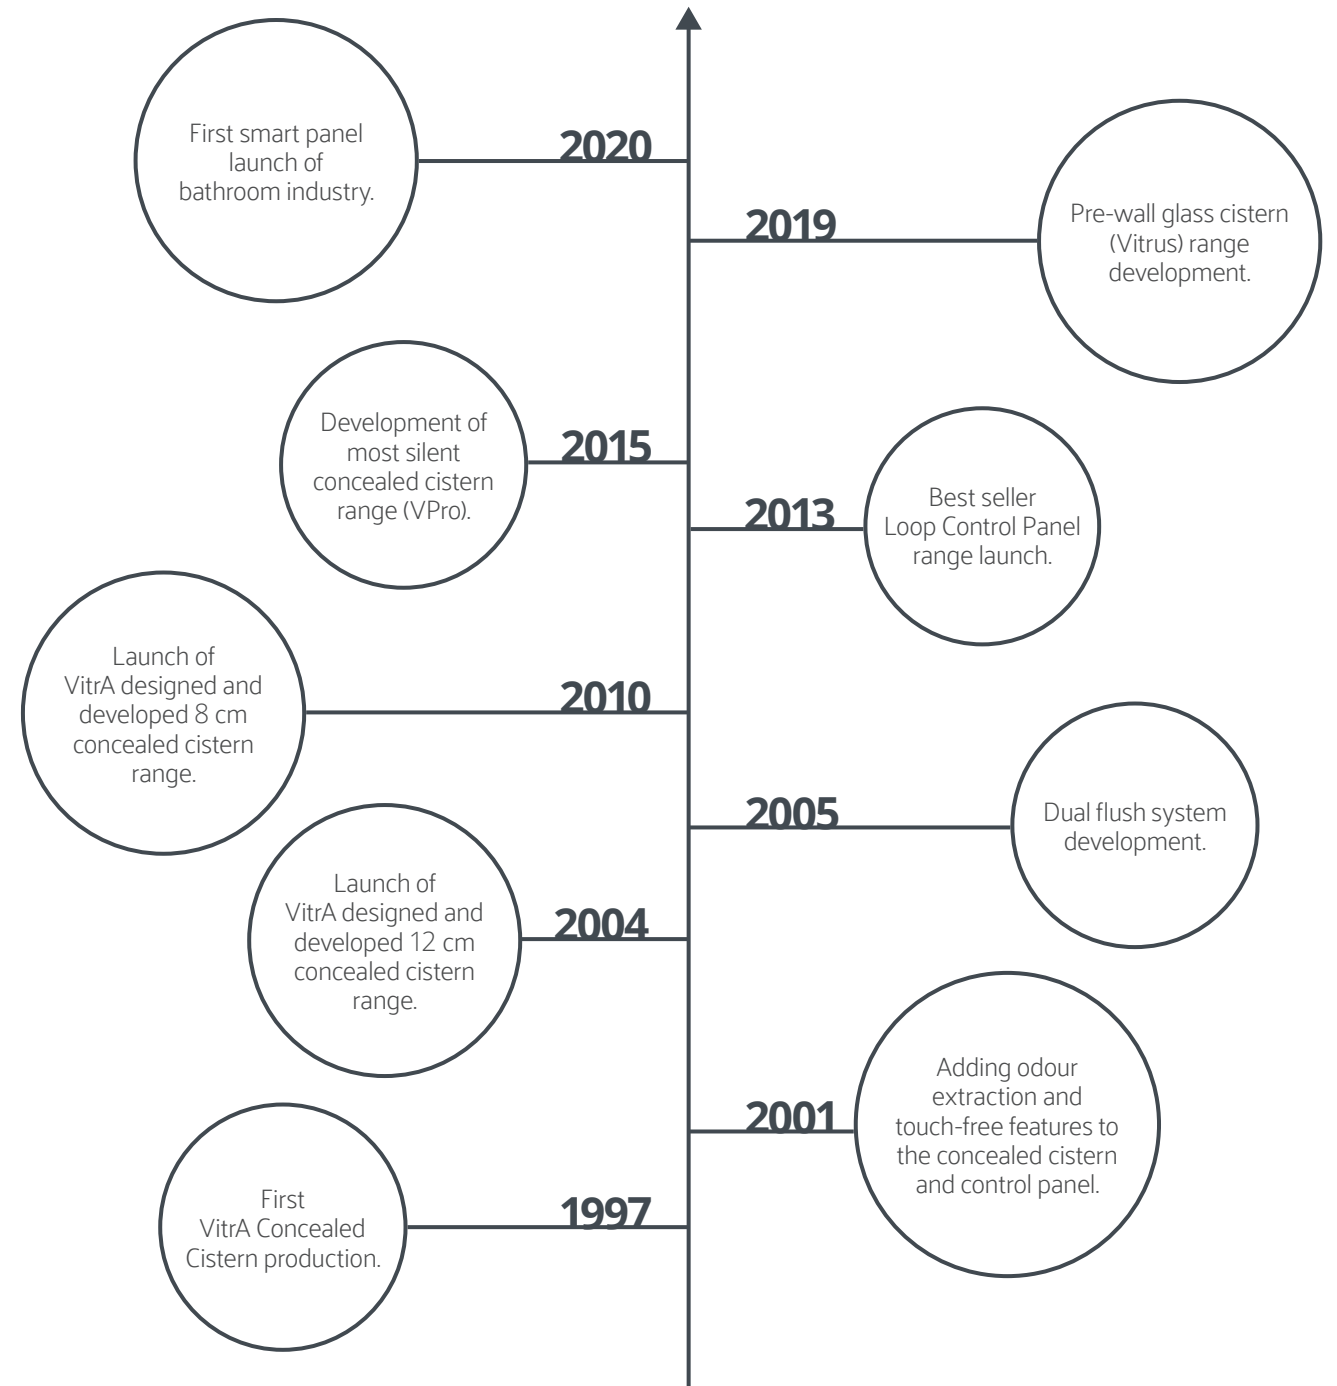

Thanks to our many continuous improvements, VitrA Concealed Cistern features provide added value to installations.

The solution hidden inside the wall changes and expands the perception of space, it still works accurately and quietly after decades as it did on installation. VitrA provides concealed cistern solutions for every wall and WC types with a strong flush and quick refilling – quiet, reliable and long term. Moreover, our history of many years engineering, rigorous internal tests and numerous external certification processes are what gives complete confidence in VitrA brand.

Also, VitrA V-Fix provide hygienic and reliable experiences for every bathroom thanks to their compatible assembly options. Benefit from our extended 10 year warranty for core products and retrofitting offer for conversion of up to 30-year-old concealed cisterns.

Highlights in VitrA V-Fix

VitrASilent Concealed Cisterns

By special filling system the cistern filling sound does not exceed 19 db and stays in the range of valve group I. Thanks to the system that instantly cuts off the filled water, disturbing noises are prevented during the cutting process.

The styrofoam on the product provides extra insulation and so that provides a quiet use both in the bathroom and in the connected living quarters.

10
years

30
years

10 years guarantee and 30 years spare part availability

Qualified, durable, and sustainable Vitra products create highly functional and reliable solutions. The durability of Vitra V-Fix is backed up by Vitra's high technology standards and engineering. In addition to the 10-year warranty, a 30-year spare part supply guarantee is also provided for each concealed cistern. Vitra always allows the purchase of spare parts to maintain the continued function of a Vitra Concealed Cistern for up to 30 years from the manufacturer's date of sale.

Perfect for bathroom design, ideal for quick and easy installation

With engineering behind, VitrA V-Fix are perfect products with their well-thought-out features that guarantee fault-free operation following many years of continuous improvement.

Highlights

- Statically self-supporting and durable up to 500 kg.
- Assembly options to dry and brick wall.
- Available for wall-mounted, back-to-wall, single WCs and also for squatting pans.
- 2.5/4 L and 3/6 L flushing options.
- Complies with sound insulation standards.

Powder-coated assembly steel frames.

The styrofoam coating over the body prevents condensation.

Conduit pipe for electrical cable transmission to conceal wiring for electrical products.

Bore holes for accommodating additional wall attachments in barrier-free toilet systems.

Sturdy, wide area crossbeams with junction box and wall connection parts for holding the ceramics securely.

Practical foot brakes for adjusting the module height allows one person assembly.

Stamped-in 1 metre mark, permanently visible and also provided as a sticker.

Easy access to interior parts during service opening.

The flexible PPRC body resistant to variations in temperature, breaking and cracking.

Conduit pipe for water supply connection in shower toilets

Integrated junction box for supplying power to electrical products.

Adjusted foot supports for floor projections of 0 cm to 20 cm attachments.

The flexible solution for a customized bathroom

Three installation heights

The newly developed Vitra VUni Concealed Cisterns which are one-piece body that is produced with blow-moulding technology can be installed at heights of 82 cm, 98 cm or 112cm which delivers outstanding flush performance every time. A water-saving dual flush conserves valuable resources and helps the cistern achieve maximum efficiency.

Child WC and back to wall WC pans, for our smallest users from kindergardens, primary schools or arcades we are offering Vitra VUni 98 cm height concealed cistern.

Top/front actuation

With a maximum depth of 21 cm and minimum depth of 15.5 cm, the Vitra VUni Concealed Cistern is compatible with all alcove situations. It can be connected to the water supply from either the back or the side and it's suitable with all Vitra mechanical control panels. Depending on the construction situation, the actuator plate that activates the flush can be installed to the top or front of the cistern. No special tools are required to install the cistern or install the actuator plate.

Aesthetic and functional

Wide control panel range for the best choice in bathrooms design.

The smart button that makes life easier

AquaControl Thermostatic

• —

The AquaControl concealed mixers make it easy to control your showering system, with a simple push of a button. It offers a comfortable and pleasurable shower experience with water that comes from both the hand shower and the showerhead, at the same time.

Comfort control

Effortless shower experience

You are always in control in the shower, even with your eyes closed, thanks to the indicator button that diverts the water to the shower head of your choosing.

When you push a function button, it will pop out, so you know which setting it is in. Therefore, even if your eyes are closed due to shampoo foam, you can easily find the AquaControl's diverter.

Blind sight

The temperature you are looking for AquaHeat Thermostatic

We know how sensitive your bathing pleasure is. With AquaHeat Thermostatic shower system, we fix the temperature of the water to the ideal temperature for the whole family. AquaHeat thermostats set the water temperature at a predefined temperature and a consistent flow. This eliminates the risk of scalding and especially safeguards the elderly and children.

Transform your bathroom space to stunning effect

• —

Bathing has always been associated with health, well-being and relaxation. Vitra's beautiful range of bathtubs continues to evoke, uphold and enhance these associations. Whatever your preference, be it free-standing or fitted, sweeping line or a calming curve, acrylic or mineral cast, our bathtubs make bathing a sensory pleasure. Our stylish range of free-standing bathtubs will not only relax the body and revitalize the spirit, but also transform your bathroom space to stunning effect.

Vitra bathtubs, made from high-grade acrylic, produce a superb finish. Each fitted bathtub features a minimum of five feet adjustable, a fully-encapsulated wooden baseboard and frame, and an advanced wall fixing kit to keep the bath tightly in place, ensuring stability with no creaking or bowing.

Vitra bathtubs & panels come with a 10-year guarantee.

Istanbul

Pure and natural organic forms inspired from Istanbul's mixed culture and traditions but a series of future.. Istanbul, Ross Lovegrove, almost defines beauty again. Completes the series with bathtub products.
